Date of Acceptance: 15-07-2024

Abstract: numerical change in energy will be explained through new algebra.

Introduction: we will try to give a new explanation of numerical change in energy etc.

Main body: Suppose static energy of body a is 90 calories. Now

We are taking 4 numbers. - 1,0,1,2.

Here 0 and 1 are true. And 2 is greater false and - 1 is lesser false.

Now suppose we want to make the energy 100 calories. $100=2(\text{greater false})$

$$100=2-1=1$$

$$100=2/2=1 \text{ etc.}$$

In this way we can achieve lesser false also.

Conclusion:

In this way we can change energy by taking - 1,0,1,2etc as digits.
